
Take Your Content to New Heights with Adlib Elevate™

Leverage your business' unstructured content by turning it into useable and actionable information

The Adlib Elevate™ platform, the foundation for the industry's most powerful content solutions, is built on market-leading [Advanced Rendering](#) technology. Adlib helps enterprise organizations in the Life Sciences, Insurance, Banking, and Energy sectors, among others, enhance Information Governance objectives by unlocking the value in unstructured content.

Integrating with key repositories and applications, Adlib's sophisticated solutions enable improved content migration, compliance, privacy and security, digital transformation, and classification. Organizations realize immediate value through Adlib's industry-leading [Content Elevation Process™](#), which consists of a robust, modular 4-phase method addressing Information Governance needs from end to end: Standardize, Analyze, Categorize, and Optimize.

This process ensures organizations have full visibility and understanding of their content, leading to greater control and the ability to meet enterprise-wide Information Governance objectives.

Watch Now

Elevate your content. Transform your business. Presenting Adlib Elevate™.

Organizations that leverage their information have an incredibly powerful advantage. This video describes the key drivers behind innovative technologies like Adlib Elevate™ & explores how the platform is helping companies find, filter, focus and act on the business information that matters.

The Adlib Content Elevation Process

Through the Content Elevation Process organizations in highly regulated industries can not only meet their Information Governance goals, but also the challenges they face. Click on one of the challenges below to learn more about how Adlib can help in that area, or check out more details on one of the phases below to see how the process truly enables organizations to unlock the value in their unstructured content.

Meet Your Business Challenges Head On with Adlib Elevate

Content migration, compliance, privacy and security, digital transformation, classification – your business challenges are varied but they all have one thing in common: they cannot be solved without addressing unstructured content. Managing the content your organization produces – whether it’s print or digital, image or text – has a critical impact on how your company deals with these challenges.

Adlib Elevate, built on Adlib’s 15 years of delivering industry-leading content solutions to thousands of Global 500 customers, enables improved Information Governance across the organization.

[Optimize](#)

Designed to save time and effort, the modernized Activiti Workflows deliver consistency and the ability to add custom engines. As Information Governance drivers and business goals change, organizations can add or remove functionality to ensure they are getting the most value from their unstructured content, and have the operational continuity to make strategic business decisions.

With Adlib Elevate, organizations can:

- ▶ Take advantage of a responsive user experience
- ▶ Easily deploy a platform that is flexible for future growth and change
- ▶ Enable efficient and intuitive workflows and streamline business processes
- ▶ Add on modules based on changing business needs
- ▶ Implement the industry's leading digital transformation technology as the foundation for downstream business processes

The Right Technology Solution for Your Organization: On Premises or in the Cloud

While some organizations prefer an on-premises solution, others are moving to the cloud at unprecedented rates. Consumer File Sync and Share applications often dominate the cloud content discussion, but many organizations are demanding private cloud or hybrid solutions to address the secure and complex nature of their document-centric business problems.

With this in mind, Adlib now offers our technology solution [in a cloud structure](#) for project-based initiatives. Our approach to automated document processing in the Cloud ensures that your critical projects can be handled with greater speed than ever and at a lower capital cost – minimizing your upfront technology and resources investment.
